Cyber Security Tips From Your Municipal Joint Insurance Fund (JIF)

Don't be a Target!

BE SUSPICIOUS: Data thieves are smarter and you should be too! Urgent bank transfer request? Always call and verify with the source directly.

PERSONAL DEVICES: Personal Devices are not only vulnerable to an attack if you are on the same network, but also subject to OPRA requests.

PASSWORDS: Reusing a password across multiple websites makes it easy for bad guys to access your data, bank accounts, and other important info.

WEB SURFING @ WORK: Clicking on questionable sites can wreak havoc on your computer and expose you to a cyber attack.

SOCIAL MEDIA: Overshare and beware! Social media websites are a key gateway for malware. Avoid sharing your DOB, schools attended, and family member's names.

REPORTING: Suspect your device is infected? Quickly report your cyber mistakes to limit exposing your entire municipality.
