

Safety Directors Office

Team Members:

Keith Hummel, Robert Garish, John Saville, Thomas Reilly, & Melissa Meccariello

J.A. Montgomery
CONSULTING

Safety Director's Office

- Purpose of the Safety Director's Office
 - Reduce exposures and injuries
 - Take a leadership role, mentor and assist our clients with being successful
 - Focused approach on the specific needs, exposures, and loss history of each member
 - Provide safety advice and consult with members of the JIF, Executive Director's Office and Qual-lynx
 - Provide Safety and Loss Prevention Programs

Mental & Physical Health

Leadership –
sets the agenda

Covid-19
Dangerous Job
Failing to identify the dangers of
the task
Look out for my safety

Challenging
Complacency

Work Culture
Safety Mindset
Predictive is preventable

Health &
Wellness

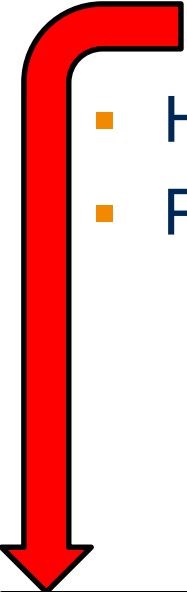

Better Health
Better Career
Better Retirement

Change the culture, refuse to be complacent and be a leader. Don't say I didn't have enough time!

Leadership and Work Culture

- Control what we can – predictable is preventable
- Complacency kills and foreseen injuries are overlooked
- Work Culture – Positive/Negative
 - Health and Wellness
 - Physical Fitness Matters
 - Make better decisions
 - Recover from minor injuries more quickly
 - Fewer injuries – thinking clearly

Do we really care or are we just going through
the motions!

We become complacent and our decision-making declines

1 Degree

Aggregation of Marginal Gains

In the beginning, there is basically no difference between making a choice that is 1% better or 1% worse. (In other words, it won't impact you very much today.) But as time goes on, these small improvements or declines compound and you suddenly find a very big gap between people who make slightly better decisions on a daily basis and those who don't.

Identifying the Risks

What are the most dangerous activities you engage in?

- Driving – U.S Fatalities – 42,915 (2021)
 - Driving – New Jersey Motor Vehicle fatalities - 584
 - Pedestrian Deaths - 191
- 2011 -2018, 144 workers killed at road construction sites in the government sector
- Confined Space – workers and rescue personnel
- Lifting
- Entering and Exiting Vehicles
- Chainsaws, power tools
- Ladders

What makes your municipality unique?

Predictable is Preventable!

- What we can control
 - Need to avoid complacency
 - Positive / Negative Attitude
 - Covid-19, do more with less, budget constraints
 - Remember we have people depending on us
 - PPE
 - Health & wellness (Debby and Jordan)
- What we cannot control
 - Unforeseen risks
 - Equipment failures
 - Nature
 - Other drivers

Job Site Observations

- Blind Spots – When you don't know what you don't know
 - Recognizing potential injuries & threats
 - What can I do to help my fellow workers be safe
 - Scanning – looking for the threats
 - Analyzing – why is it occurring and what can I do to fix it
 - Responding – putting an action plan together, training my personnel, coaching and mentoring, encouraging them to report near misses!
 - Creating a positive work environment
 - Assessment - it is working or do I need to adjust

Roll Call Training

- Studies have shown that organizations that conduct roll call training / pre-shift briefs – have 50% less accidents
 - MSI online training
 - MSI Bulletins
 - Leadership matters, coaching and counseling
 - Telling stories of past incidents
 - Emphasizing that we need to look out for one another
 - Treat one another with respect, no locker room banter, or joking around
 - You never know when the line has been crossed
 - Creates a hostile work environment

Health Awareness

- Why is our personal health so important?
 - Improves our quality of life
 - Experience less physical pain
 - Improves mental health – direct correlation
 - Live better and longer
 - Prevent the spread of diseases
 - Better chances of survival
 - Safeguards your family's health
 - Live happier

Comorbidities – Chronic Conditions

■ CLINICAL ■

Effect of Multiple Chronic Conditions Among Working-Age Adults

James M. Naessens, ScD; Robert J. Stroebe, MD; Dawn M. Finnie, MPA; Nilay D. Shah, PhD;
Amy E. Wagie, BA; William J. Litchy, MD; Patrick J. F. Killinger, MA; Thomas J. D. O'Byrne, BS;
Douglas L. Wood, MD; and Robert E. Nesse, MD

Objective: To determine the longitudinal effect on healthcare costs of multiple chronic conditions among adults aged 18 to 64 years.

Study Design: Retrospective cohort assessment of working-age employees and their dependents with continuous coverage in a self-funded health plan from January 1, 2004, to December 31, 2007. Data were obtained from health benefit enrollment files and from medical and pharmacy claims.

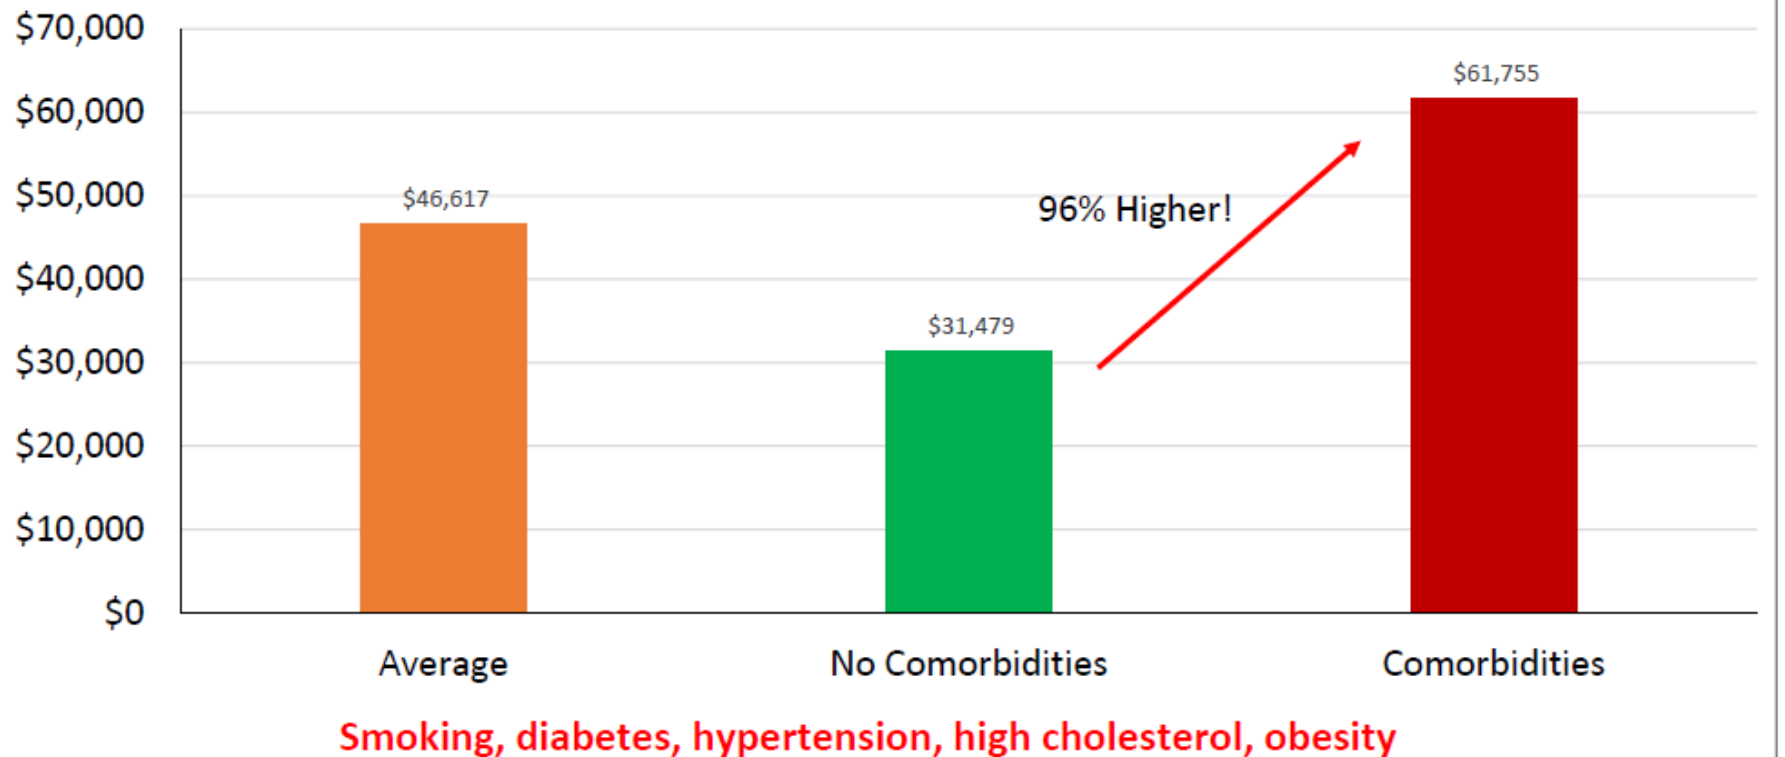

Methods: Individuals were defined as having chronic conditions based on modification of a published method. The mean annual healthcare costs were estimated for individuals with 0, 1, 2, 3, 4, or 5 or more chronic conditions. The probability of persistence in high-cost categories across years was estimated for individuals in each group.

Results: Overall, 75.3% of working-age adult enrollees had at least 1 chronic condition, 54.3% had multiple chronic conditions, and 16.5% had 5 or more chronic conditions. The cost of healthcare was higher among individuals with more chronic conditions for all ages. The mean medical cost per year for an individual with no chronic conditions was \$2137, while that for an individual with 5 or more chronic conditions was \$21,183. Enrollees with more chronic conditions had higher persistence in high-cost categories between years and persisted at these high costs for more years.

Conclusions: While multiple chronic conditions are common in the population 65 years and older, they are also of great concern for the working-age population. Understanding how to effectively manage individuals with multiple chronic conditions is an important challenge. Effective care management focused on managing the patient as opposed to a condition has the potential to significantly affect healthcare costs.

Improving Safety Culture

- Safety must be part of our work culture
 - It's all about leadership and caring about our personnel
- Explain the why and how
 - Be a safety consultant and care, don't be a safety cop, outline the rationale of why!
 - Engage in the process of micro training
- Create a strong and positive working relationship between management and your workforce
- Don't limit your focus on compliance – focus on the well being of your personnel – once they know you care they will follow!

Improving Safety Culture

- END THE BLAME GAME!
 - Stop pointing the finger, people fear reprisal
 - Was it a mistake of the mind?
 - Complacency or a system error
 - Look at processes first before blaming the employee!
 - Was it a mistake of the heart?
 - Purposely and knowingly, vandalism, theft, etc.
 - Investigate the reasons and get assistance

Improving Safety Culture

- Safety culture is a top to bottom effort!
 - Job Site Observations are designed to help with your safety culture
 - The keep employees engaged
 - Roll call / Shift briefings
 - Identify the risk, mindset, diminishing skills
 - Encourage personnel to report near misses!
 - Think about your employee's physical and mental health
 - Better health, better decisions, better recovery, better life!

THE POWER OF THE BURLCO JIF.

28 Municipalities from Burlington county joined forces to save tax dollars by pooling resources to provide workers comp, liability, property and casualty insurance. Through a structured safety and risk management program, Member Municipalities save money by eliminating unsafe acts and conditions. Unlike the insurance companies that preceded it, the JIF focuses on Municipal issues of loss prevention, risk management and claims management. [READ MORE](#)
